

**DOLLY VARDEN SILVER CORPORATION**  
**For the three months ended March 31, 2017**  
**Management's Discussion and Analysis**

---

This Management Discussion and Analysis ("MD&A") should be read in conjunction with the unaudited condensed interim financial statements for the three month period ended March 31, 2017 and 2016, and the audited financial statements of Dolly Varden Silver Corporation (the "Company") for the year ended December 31, 2016. This MD&A contains forward-looking information and statements, which are based on the conclusions of management. The forward-looking information and statements are only made as of May 18, 2017, the effective date of this MD&A.

All financial information is presented in Canadian dollars unless otherwise stated. The Company is a reporting issuer in British Columbia. The Company's common shares trade on the TSX Venture Exchange under the symbol "DV". Financial results are reported in accordance with International Financial Reporting Standards ("IFRS").

Additional information related to the Company is available on SEDAR at [www.sedar.com](http://www.sedar.com).

**OVERVIEW**

The Company is a Canadian based mineral exploration company focused on the exploration of the Dolly Varden Silver Property located in Northwestern British Columbia, Canada. The Company owns 100% interest in the Dolly Varden Silver Property, subject to 2% net smelter return ("NSR") and has an option to acquire 100% interest in the Musketeer property, which is an internal claim group to the Dolly Varden Project.

The Company currently has no producing properties and consequently no operating income. The recovery of the amounts comprising exploration and evaluation assets are dependent upon (1) the ability of the Company to obtain necessary financing to successfully complete the exploration and development of those reserves, (2) the confirmation of economically recoverable reserves, (3) upon future profitable production or on selling the property. It is the intention of the Company to obtain financing through access to public equity markets, debt, and partnerships or joint ventures as sources of funding for its exploration expenditures and to meet ongoing working capital requirements.

**HIGHLIGHTS AND SIGNIFICANT EVENTS**

- On January 3, 2017, the Company appointed Ben Whiting, P. Geo., Vice President, Exploration and announced that Rory Kutluoglu was stepping down from that position.
- On February 28, 2017, the Company completed a private placement, raising gross proceeds of \$2 million through the sale of 1,369,863 common shares at a price of \$0.73 per share and 1,176,470 flow-through shares at a price of \$0.85 per share.

## **MINERAL PROPERTIES**

### **Dolly Varden Project ("DV Project")**

The DV Project contains the core of the historic silver-rich Dolly Varden Mining Camp north of Alice Arm, within the regionally important and prolific Stewart Complex in northwestern British Columbia. The DV Project comprises an area of 8,800 hectares and includes the Dolly Varden and Big Bulk claims and an option to earn a 100% interest in the Musketeer property.

### **Dolly Varden Silver Properties**

The DV Project encompass several historic underground workings, including the Dolly Varden, North Star, Torbrit, and Wolf Mines, as well as several other showings and many mineralized prospects. The silver-rich deposits found on the DV Project are hosted in Jurassic-age volcanic and sedimentary rocks (Iskut River Formation) of the Hazelton Group. They display textural and mineralogical similarity to mineralization found in the region in subaqueous, gold-silver-rich, hot spring-type volcanogenic massive sulfide (VMS), and epithermal style deposits, such as the Eskay Creek and Brucejack deposits, respectively. The nearby Big Bulk claims host porphyry copper-gold style mineralization.

Since acquiring the DV Project in 2011, field work was dedicated to confirming and expanding the known mineralization near the historic deposits: Wolf, Dolly Varden, Torbrit, and North Star. The Company's work consisted of surface and underground mapping, underground rehabilitation, detailed sampling, data compilation from reliable historic records, and over 17,000 meters of core drilling. This data was used to complete a mineral resource estimate as outlined below.

The Company's 2014 and 2015 exploration programs conducted work on regional targets of the DV Project. The programs applied known mineralization signatures from the historic deposits northward on the DV Project toward more regional targets, where the Company's mapping and sampling shows continuation of favorable lithologies and prospective structural features coincident with geochemical anomalies, intense alteration and historic showings and workings. These exploration programs were comprised of continued surface work throughout the property, but extending outwards, particularly to the northeastern portions of the property, additional drilling in the resource areas and exploration drilling in favourable target areas.

### **Musketeer Properties**

In 2013, the Company entered into an option agreement with Musketeer Developments Ltd. and certain other parties to obtain a 100% interest in the Musketeer Property by making option payments totalling \$1,050,000 due on various defined dates, subject to a 2% NSR. A payment was made in February 2016 of \$91,000, and a payment was made in February 2017 of \$102,334, with a final remaining payment due in February 2018 of \$100,000. These claims are internal contiguous claims within the DV Project area. This agreement marks the Company's full consolidation of all of the major developed silver prospects and past producing mines in the Upper Kitsault Valley. Limited historical work has been completed on the Musketeer property, with additional areas of interest including surface prospects at Kitsol, South Musketeer, and North Musketeer. Two diamond drill holes tested the North Musketeer showing during the 2014 program.

### **2016 Exploration Program**

In September 2016, the Company commenced its 2016 field campaign with work focused on the Ace-Galena and the Torbrit areas on the DV Project. Work completed during the third quarter of 2016 included collection of 240 litho-geochemical rock samples, predominantly focused in the Ace-Galena Trend and Chance Trend, with minor

**DOLLY VARDEN SILVER CORPORATION**  
**For the three months ended March 31, 2017**  
**Management's Discussion and Analysis**

---

sampling in the Medallion area and geological mapping of the same areas. Mapping and sampling of surface alteration occurrences and anomalies provided data for further prioritization and de-risking of exploratory targets.

During the 2016 exploration program, DV mobilized a diamond drill and crew to site and have completed 2312m of drilling: 746m focused on continued exploration at the Torbrit Deposit and 1359m of drilling in the Ace-Galena Trend and 207m drilled in the Chance Trend. Five drill holes were drilled at the Torbrit Target to fill in zones within the mineral resource shapes where no data existed. This drilling confirmed growth potential of the Torbrit resource area with the intersection of multiple mineralized zones including 2.0 meters of 2,488.5 grams of silver per tonne (g/t silver) within a broader intercept of 19.4 meters grading 485 g/t silver.

In 2016, drilling on the Ace-Galena trend followed up on drilling from and moved further northward, confirming and extending the mineralized horizons an additional 300 meters along strike. Mineralization at Ace Galena is contained in a bedded, variably-calcareous sedimentary volcanoclastic package with high grade intercepts of 405.7 g/t silver over 3.25 meters encountered with drilling.

### **Mineral Resource Estimate**

A maiden National Instrument 43-101 Standards of Disclosure for Mineral Projects ("NI43-101") compliant mineral resource estimate was released on August 27, 2015. The mineral resource estimate was completed by Giroux Consultants Ltd. and covered the four known deposits on the DV Project. The Indicated resource estimate for the Dolly Varden, North Star, Torbrit, and Wolf deposit totals 31.8 million ounces of silver within 3.07 million tonnes of material with an average grade of 321.6 grams of silver per tonne ("g/t silver"). The Inferred mineral resource totals an additional 10.8 million ounces of silver at a grade of 373.3 g/t silver within 0.9 million tonnes of material. Readers should refer to the Company's continuous disclosure documents available at [www.sedar.com](http://www.sedar.com) for more detailed information regarding the mineral resource estimate, which is subject to the qualifications and notes set forth therein.

### **2017 Exploration Program**

On February 16, 2017, the Company announced approval for a \$3.5 million exploration program on Dolly Varden, including approximately 5,000 metres of diamond drilling, geological mapping and geophysical sampling. An airborne geophysical survey is also planned for the Big Bulk Property.

Community relations activities have commenced, with the first formal meeting on May 1, 2017 with Nisga'a Lisims Government representatives.

The field activities are expected to commence with the first equipment barge from Prince Rupert to Alice Arm set for May 24, 2017.

### **Qualified Person**

The Dolly Varden Property exploration program is directed by Ben Whiting, P.Geo., Vice President, Exploration, who is a "qualified person" as defined by National Instrument 43-101 and who also prepared and approved the scientific and technical information contained in this MD&A.

---

**RESULTS OF OPERATIONS**

**For the three months ended March 31, 2017**

The total loss for the three month period ended March 31, 2017 was \$467,848 as compared to \$117,660 for the prior comparative period.

Expenses for the current quarter amounted to \$492,687 (2016 - \$107,124). Exploration and evaluation expenditures of \$101,456 (2016 - \$41,437). Administrative and consulting fees increased to \$15,637 (2016 - \$8,640), primarily due to the change in management. Directors' fees were higher at \$31,210 (2016 - \$3,486) due to the fair value change in Deferred Share Units of \$11,335 as a result of the increasing share price in the period, combined with cash fees paid of \$19,875. In the comparative period, there were no cash fees and the amount was due to the accrual of new Deferred Share Units and the fluctuation in the fair value change in existing Deferred Share Units. Management fees were higher than the prior period at \$75,000 (2016-\$37,322), due to the change in management with the mix of employment contracts versus management contracts. Expenditures for Marketing and communications of \$61,257 (2016 - \$891) has increased due to the marketing program introduced in the prior year. Office costs have increased to \$70,571 (2016-\$10,635) due to the new shared service contract with Belcarra Group Management Inc. Professional fees increased to \$30,828 (2016 -\$7,740) due to increased activity. Rent and maintenance fees were increased to \$3,207 (2016-\$690) as the Company had temporarily taken up space at no cost within Hecla Canada's offices, prior to securing its own office space late in the prior year, the Company will now be utilizing shared space within the Belcarra Group Management office. Salaries and benefits were higher at \$81,642 (2016-\$Nil), due primarily to severance amounts incurred relating to management changes. Share-based compensation increased to \$11,284 (2016-\$Nil) due to the vesting of investor relations stock options in the period. Transfer agent and filing fees increased to \$7,953 (2016- recovery \$3,717) due to filing and sustaining fees incurred. Travel and accommodation increased to \$1,967 in the current period (2016-\$Nil) due to investor relations activity.

Finance charges were \$Nil (2016 - \$22,917) due to the interest payable on the prior period credit facility.

The Company recognized a recovery on the flow-through share premium of \$13,786 (2016 - \$Nil) when the required qualifying expenditures for flow-through shares have been accrued for.

Lastly, interest income was higher than the comparative period at \$11,044 (2016-\$Nil) due to the higher average cash balance held in the current year.

<sup>(1)</sup> On June 19, 2015, the common shares of the Company were consolidated on a 10:1 basis. Comparative periods are presented as if the 10:1 consolidation had taken place prior to the earliest periods presented.

While the information set out in the foregoing table is mandated by *National Instrument 51-102*, it is management's view that the variations in financial results that occur from quarter to quarter are not particularly helpful in analyzing the Company's performance. It is in the nature of the business of junior exploration companies that unless they sell a mineral interest for a sum greater than the costs incurred in acquiring such interest, they have no significant net sales or total revenue.

Significant variances in the Company's reported loss from quarter to quarter most commonly arise from several factors that are difficult to anticipate in advance or to predict from past results. These factors include: (i) level of exploration and project evaluations expenses incurred, (ii) decisions to write off acquisition costs when management concludes there has been an impairment in the carrying value of a mineral property, or the property is abandoned, and (iii) the vesting of incentive stock options, which results in the recording of amounts for share-based compensation expense that can be quite large in relation to other general and administrative expenses incurred in any given quarter.

**Selected Annual Information**

<b>Year</b>	<b>2016</b>	<b>2015</b>	<b>2014</b>
Net sales or total revenue	\$Nil	\$Nil	\$Nil
Net Loss:			
(i) in total (000's)	\$4,968	\$3,565	\$5,371
(ii) per share <sup>(1)</sup>	\$0.21	\$0.20	\$0.35
Working Capital/(Deficiency) (000's)	\$4,521	(\$1,822)	\$1,343
Exploration and evaluation assets (000's)	\$3,524	\$3,443	\$3,240
Total Assets (000's)	\$8,775	\$3,972	\$5,446

(1) Per Share amounts are calculated using the weighted average number of shares outstanding.

**Investing Activities**

During the three month period ended March 31, 2017, the Company invested \$102,334 (2016 - \$91,000) in property acquisitions related to the option agreement on the Musketeer property. During the comparative quarter, the Company sold some surplus exploration equipment for cash proceeds of \$24,000.

**Financing Activities:**

During the three month period ended March 31, 2017, the Company completed the following:

A private placement on February 28, 2017 raised gross proceeds of \$2,000,000 through the sale of 1,369,863 common shares at a price of \$0.73 per share and 1,176,470 flow through shares at a price of \$0.85 per share. In connection with this private placement, the Company paid a finder's fee of \$120,000, equal to 6% of the gross proceeds in the offering and share issuance costs of \$11,900. The Company recorded a flow-through premium liability of \$141,176 for the difference between the fair value of its common shares and the issuance price of its flow-through common shares.

During the three month period ended March 31, 2016, the Company did not complete any equity financings.

At March 31, 2017, included in accounts payable and accrued liabilities is \$160,981 (December 31, 2016 - \$493,174) owed to directors, officers, and former directors and/or officers of the Company. These amounts are unsecured, non-interest bearing and are due on demand.

At March 31, 2017, included in prepaid expenses is \$Nil paid to an officer of the Company (December 31, 2016 - \$40,000).

### **Off Balance Sheet Arrangements**

The Company is not party to any off balance sheet arrangements.

### **LIQUIDITY AND CAPITAL RESOURCES**

The Company has no operations that generate cash flow. The Company's future financial success will depend on its ability to raise capital or on the discovery of one or more economic mineral deposits. Discovery may take many years, can consume significant resources and is largely based on factors that are beyond the control of the Company and its management. To date, the Company has financed its activities by the issuance of equity securities, consisting of a combination of flow-through and non-flow securities and most recently by debt. In order to continue funding their exploration activities, corporate costs and repayment of debt, exploration companies are usually reliant on their ongoing ability to raise financing through the sale of equity. This is dependent on positive investor sentiment, which in turn is influenced by a positive climate for the target commodities, a company's track record, and the experience

**DOLLY VARDEN SILVER CORPORATION**  
**For the three months ended March 31, 2017**  
**Management's Discussion and Analysis**

---

and caliber of the company's management. There is no assurance that equity funding will be accessible to the Company at the times and in the amounts required to fund the Company's activities.

**Cash and Financial Condition**

As at March 31, 2017, the Company had a working capital surplus of \$5,827,610.

**FINANCIAL INSTRUMENTS**

The Company's financial instruments currently consist of cash, receivables, advances, deposits, and accounts payable and accrued liabilities. The fair value of cash is based on Level 1 of the fair value hierarchy. The fair value of receivables, advances, deposits and accounts payable and accrued liabilities, loans and interest payable approximate their book values because of the short-term nature of these instruments. Moreover, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

**RISK FACTORS**

The Company is subject to risks and challenges similar to other companies in a comparable stage of development. These risks include, but are not limited to, continuing losses, dependence on key individuals, and the ability to secure adequate financing to meet minimum capital required to successfully complete its projects and continue as a going concern. These factors should be reviewed carefully.

The following risk factors, in addition to the risks noted above in the "Financial Instruments and Liquid and Capital Resources" sections, should be given special consideration when evaluating trends, risks and uncertainties relating to the Company's business.

*Exploration, Development and Production Risks*

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge of management and key employees and contractors of the Company may not eliminate. Few exploration and evaluation assets which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in the definition of a mineral resource. The Company's operations will be subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity, flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company. Substantial expenditures are required to establish ore reserves through drilling, to develop metallurgical processes to extract the metal from the ore and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis. The economics of developing silver and other exploration and evaluation assets is affected by many factors, including the cost of operations, variations in the grade of ore mined, fluctuations in metal markets, costs of processing equipment and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals and

**DOLLY VARDEN SILVER CORPORATION**  
**For the three months ended March 31, 2017**  
**Management's Discussion and Analysis**

---

environmental protection. The remoteness and restrictions on access of the Company's exploration and evaluation assets may have an adverse effect on profitability as a result of higher infrastructure costs. There are also physical risks to the exploration personnel working in the terrain in which the Company's exploration and evaluation assets are located, which are subject to poor climate conditions. The long-term commercial success of the Company depends on its ability to explore, develop and commercially produce minerals from its exploration and evaluation assets and to locate and acquire additional properties worthy of exploration and development for minerals. No assurance can be given that the Company will be able to locate satisfactory properties for acquisition or participation. Moreover, if such acquisitions or participations are identified, the Company may determine that current markets, terms of acquisition and participation or pricing conditions make such acquisitions or participation uneconomic.

*Substantial Capital Requirements*

Management of the Company anticipates that it may make substantial future capital expenditures for the acquisition, exploration, development and production of its exploration and evaluation assets. As the Company will be at the exploration stage with no revenue being generated from the exploration activities on its exploration and evaluation assets, the Company may have limited ability to raise the capital necessary to undertake or complete future exploration work, including drilling programs. There can be no assurance that debt or equity financing will be available or sufficient to meet these requirements or for other corporate purposes or, if debt or equity financing is available, that it will be on terms acceptable to the Company. Moreover, future activities may require the Company to alter its capitalization significantly. The inability of the Company to access sufficient capital for its operations could have a material adverse effect on the Company's financial condition, results of operations or prospects. In particular, failure to obtain such financing on a timely basis could cause the Company to forfeit its interest in its exploration and evaluation assets, miss certain acquisition opportunities and reduce or terminate its operations.

*Competition*

The mining industry is highly competitive. Many of the Company's competitors for the acquisition, exploration, production and development of exploration and evaluation assets, and for capital to finance such activities, include companies that have greater financial and personnel resources available to them than the Company.

*Volatility of Mineral Prices*

The market price of any mineral is volatile and is affected by numerous factors that are beyond the Company's control. These include international supply and demand, the level of consumer product demand, international economic trends, currency exchange rate fluctuations, the level of interest rates, rate of inflation, global or regional political events and international events as well as a range of other market forces. Sustained downward movements in mineral market prices could render less economic, or uneconomic, some or all of the mineral extraction and/or exploration activities to be undertaken by the Company.

*Mineral Reserves / Mineral Resources*

The Company's exploration and evaluation assets are considered to be in the early exploration stage only and do not contain a known body of commercial minerals. Mineral reserves are, in the large part, estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Reserve estimates for exploration and evaluation assets that have not yet commenced production may require revision based on actual production experience. Market price fluctuations of metals, as well as increased production costs or reduced recovery rates may render mineral reserves containing relatively lower grades of mineralization uneconomic and may ultimately result in a restatement of reserves. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of the ore bodies and the processing of new or different mineral grades may cause a mining operation to be unprofitable in any particular accounting period.

### *Environmental Risks*

All phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and state and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability of operations.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at any future producing exploration and evaluation assets or require abandonment or delays in the development of new mining properties.

### *Reliance on Key Personnel*

The success of the Company will be largely dependent upon the performance of its management and key employees and contractors. In assessing the risk of an investment in the shares of the Company, potential investors should realize that they are relying on the experience, judgment, discretion, integrity and good faith of the proposed management of the Company.

### *Conflicts of Interest*

Certain directors and officers of the Company will be engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies. As a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The Business Corporations Act (British Columbia) (the "BCBCA") provides that in the event that a director or senior officer has a material interest in a contract or proposed contract or agreement that is material to the issuer, the director or senior officer must disclose his or her interest in such contract or agreement and a director must refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the BCBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the BCBCA. To the knowledge of the management of the Company, as at the date hereof, there are no existing or potential material conflicts of interest between the Company and a director or officer of the Company except as otherwise disclosed in this MD&A.

---

*Dividends*

To date, the Company has not paid any dividends on its outstanding common shares. Any decision to pay dividends on the shares of the Company will be made by the Board on the basis of the Company's earnings, financial requirements and other conditions.

*Substantial number of authorized but unissued shares*

The Company has an unlimited number of common shares which may be issued by the Board without further action or approval of the Company's shareholders, except in limited circumstances. While the Board is required to fulfill its fiduciary obligations in connection with the issuance of such shares, the shares may be issued in transactions with which not all shareholders agree, and the issuance of such shares will cause dilution to the ownership interests of the Company's shareholders.

*Permits and Licenses*

The activities of the Company are subject to government approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters, including issues affecting local native populations. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company.

Further, the mining licenses and permits issued in respect of its mineral property may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in its exploration and evaluation assets may decline.

*Title Risks*

The acquisition of title to exploration and evaluation assets or interests therein is a very detailed and time-consuming process. The exploration and evaluation assets may be subject to prior unregistered agreements or transfers and title may be affected by undetected defects.

*Limited Operating History*

The Company was incorporated on March 4, 2011 and has yet to generate a profit from its activities. The Company will be subject to all of the business risks and uncertainties associated with any business enterprise, including the risk that it will not achieve its growth objective. The Company anticipates that it may take several years to achieve positive cash flow from operations. Even if the Company does undertake exploration activity on its exploration and evaluation assets, there is no certainty that the Company will produce revenue, operate profitably or provide a return on investment in the future.

*Uninsured Risks*

The Company, as a participant in mining and exploration activities, may become subject to liability for hazards that cannot be insured against or against which it may elect not to be so insured because of high premium costs. Furthermore, the Company may incur a liability to third parties (in excess of any insurance coverage) arising from negative environmental impacts or any other damage or injury.

*Unforeseen Expenses*

While the Company is not aware of any expenses that may need to be incurred that have not been taken into account, if such expenses were subsequently incurred, the expenditure proposals of the Company may be adversely affected.

**OUTSTANDING SHARE DATA**

The Company has unlimited authorized common shares and the issued and outstanding share capital at the date of this MD&A is:

---

	Common shares		
	Issued and		
	Outstanding	Warrants	Options
<b>Balance at December 31, 2016</b>	34,464,759	5,892,550	2,955,000
<b>Balance at March 31, 2017</b>	37,036,092	5,892,550	2,585,000
<b>Balance as at the date of this MD&amp;A</b>	37,036,092	5,892,550	2,585,000

**MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL STATEMENTS**

The information included in the condensed interim financial statements and this MD&A is the responsibility of management, and their preparation in accordance with IFRS requires management to make estimates and their assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the condensed interim financial statements, and the reported amount of expenses during the reported period. Actual results could differ from those estimates.

**FORWARD LOOKING STATEMENTS**

This MD&A contains forward-looking statements that are based on the Company's current expectations and estimates. Forward-looking statements are frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate", "suggest", "indicate" and other similar words or statements that certain events or conditions "may" or "will" occur. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that could cause actual events or results to differ materially from estimated or anticipated events or results implied or expressed in such forward-looking statements. Such factors include, among others: the actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; possible variations in ore grade or recovery rates; accidents, labour disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing; and fluctuations in metal prices. There may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. Any forward-looking statement speaks only as of the date on which it is made and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking statement, whether as a result of new information, future events or results or otherwise. Forward-looking statements are not guarantees of future performance and accordingly undue reliance should not be put on such statements due to the inherent uncertainty therein.
