# CAUTIONARY STATEMENT

## CAUTIONARY STATEMENT

This presentation may contain forward-looking statements that are not historical facts. Forward Looking Information includes, but is not limited to, disclosure regarding possible events, conditions or financial performance that is based on assumptions about future economic conditions and courses of action; the timing and costs of future exploration activities on Dolly Varden Silver Corporation ("Dolly Varden") properties; success of exploration activities; permitting timelines and requirements; requirements for additional capital; environmental requirements; planned exploration and development of properties and the results thereof; planned expenditures and budgets and the execution thereof. Often, but not always, forward-looking statements can be identified by the use of words such as "expects," "plans," "estimates," "intends," "believes," "could," "might," "will," "budget," "scheduled," "forecasts," "anticipates," "potential," "base case" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements involve known and unknown risks, uncertainties, and other factors which may cause the actual results, performance, or achievements of Dolly Varden to be materially different from any future results, performance, or achievements expressed or implied by the forward-looking statements. Forward looking statements or information relates to, among other things, Dolly Varden's corporate strategies, mineral resource estimates and plans for further exploration, which will require additional funding. These forward-looking statements are based on management's current expectations and beliefs (including the belief in the accuracy of the resource estimate) but given the uncertainties, assumptions and risks, readers are cautioned not to place undue reliance on such forward-looking statements or information. Information in this presentation is not intended to be a comprehensive review of all matters and developments concerning Dolly Varden and Dolly Varden does not assume any obligation to update, or to publicly announce, any such statements, events or developments, except as required by law.

For additional information on risks and uncertainties, see Dolly Varden's most recently filed annual management discussion & analysis ("MD&A"), which is available on SEDAR at [www.sedar.com](http://www.sedar.com) and on Dolly Varden's website at [www.dollyvardensilver.com](http://www.dollyvardensilver.com). The risk factors identified in the MD&A are not intended to represent a complete list of factors that could affect Dolly Varden.

## COMPLIANCE WITH NI 43-101

The technical information in this presentation (the "Technical Information") has been approved by Robert van Egmond, P.Geo. VP Exploration for Dolly Varden Silver Corp and a Qualified Person under NI43-101 definitions. For readers to understand the information in this presentation, they should read the technical report (available [www.sedar.com](http://www.sedar.com)) in its entirety (the "Technical Report"), including all qualifications, assumptions and exclusions that relate to the information set out in this presentation that qualifies the Technical Information. The Technical Report is intended to be read as a whole, and sections or summaries should not be read or relied upon out of context. The Technical Information in the Technical Report is subject to the assumptions and qualifications contained therein.

Some of the mineral resources at the Dolly Varden Property are categorized as indicated and some as inferred mineral resources. Mineral resources that are not mineral reserves do not have demonstrated economic viability. Mineral resource estimates do not account for mineability, selectivity, mining loss and dilution. These mineral resource estimates include inferred mineral resources that are normally considered too speculative geologically to have economic considerations applied to them that would enable them to be categorized as mineral reserves. There is also no certainty that these inferred mineral resources will be converted to measured and indicated categories through further drilling, or into mineral reserves, once economic considerations are applied.

# Kitsault Valley Trend

# Kitsault Valley

## 15km Mineralized Trend

## Geochemistry

- Anomalous Gold in Soils (>50ppb)
- Anomalous Silver in Soils (>15ppm)

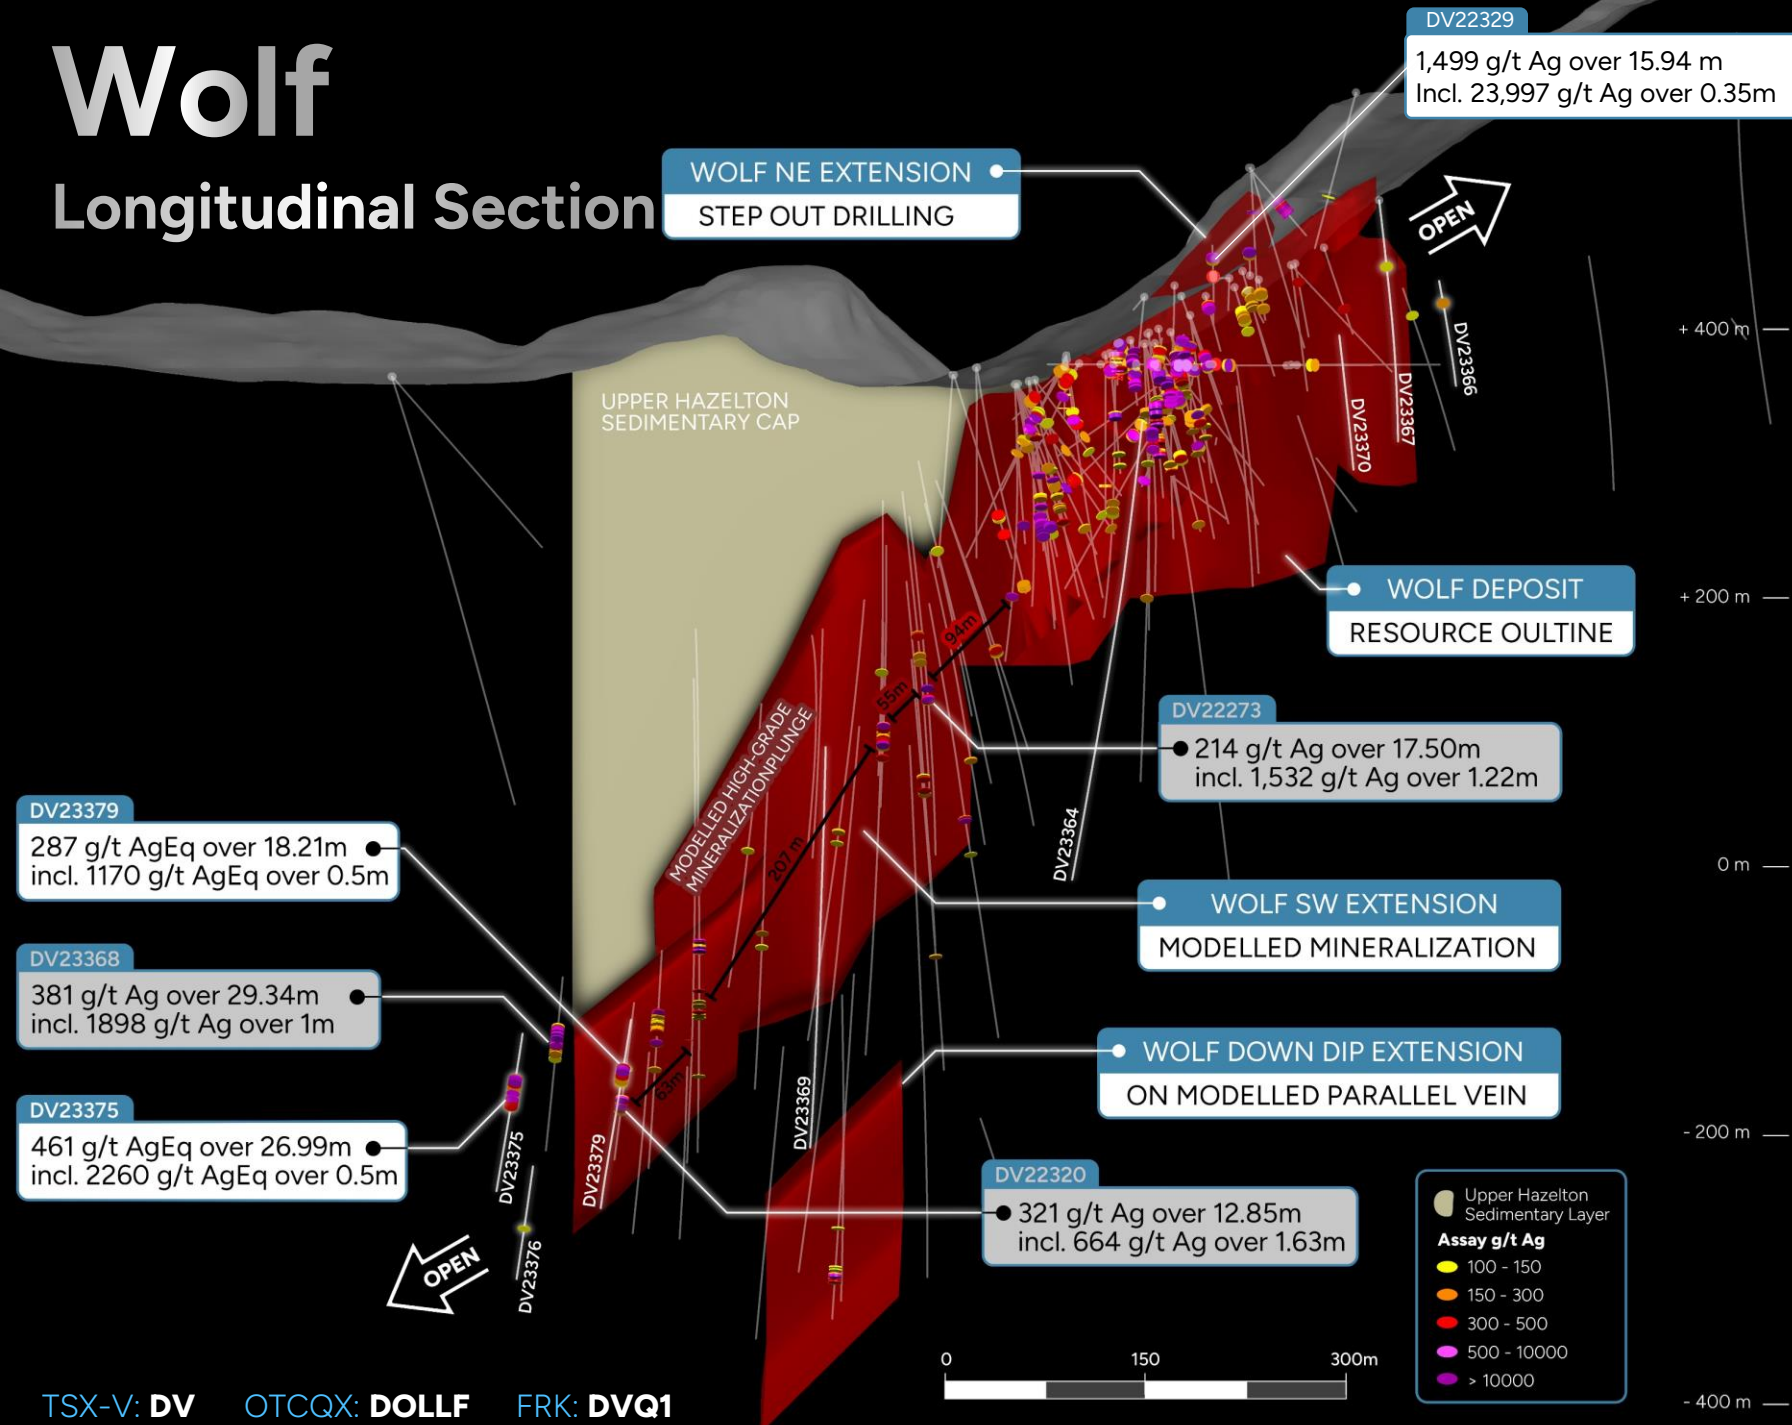

## Magnetics

# Wolf

## Longitudinal Section

Wolf Vein System extended to the SW and NE from the existing Mineral Resource for a total plunge length of 900m to the high-grade Silver zone.

The Wolf Vein mineralization remains open to depth and up plunge for further expansion. The down dip zone intersected 400m below the high-grade shoot is a parallel zone open in all directions.

# Homestake

## Longitudinal Section

2.5 km

Results to date from the infill drilling demonstrates continuity of high-grade Gold shoot within the Homestake Main deposit

# Exploration

51,527m of exploration drilling in 2023

Continued property scale target generation

Build on successful discovery & expansion at Wolf & Homestake ridge

PEA level metallurgical test work at Dolly Varden and Homestake Ridge

Extend ground geophysics coverage in areas where anomalies indicate strong alteration and mineralization

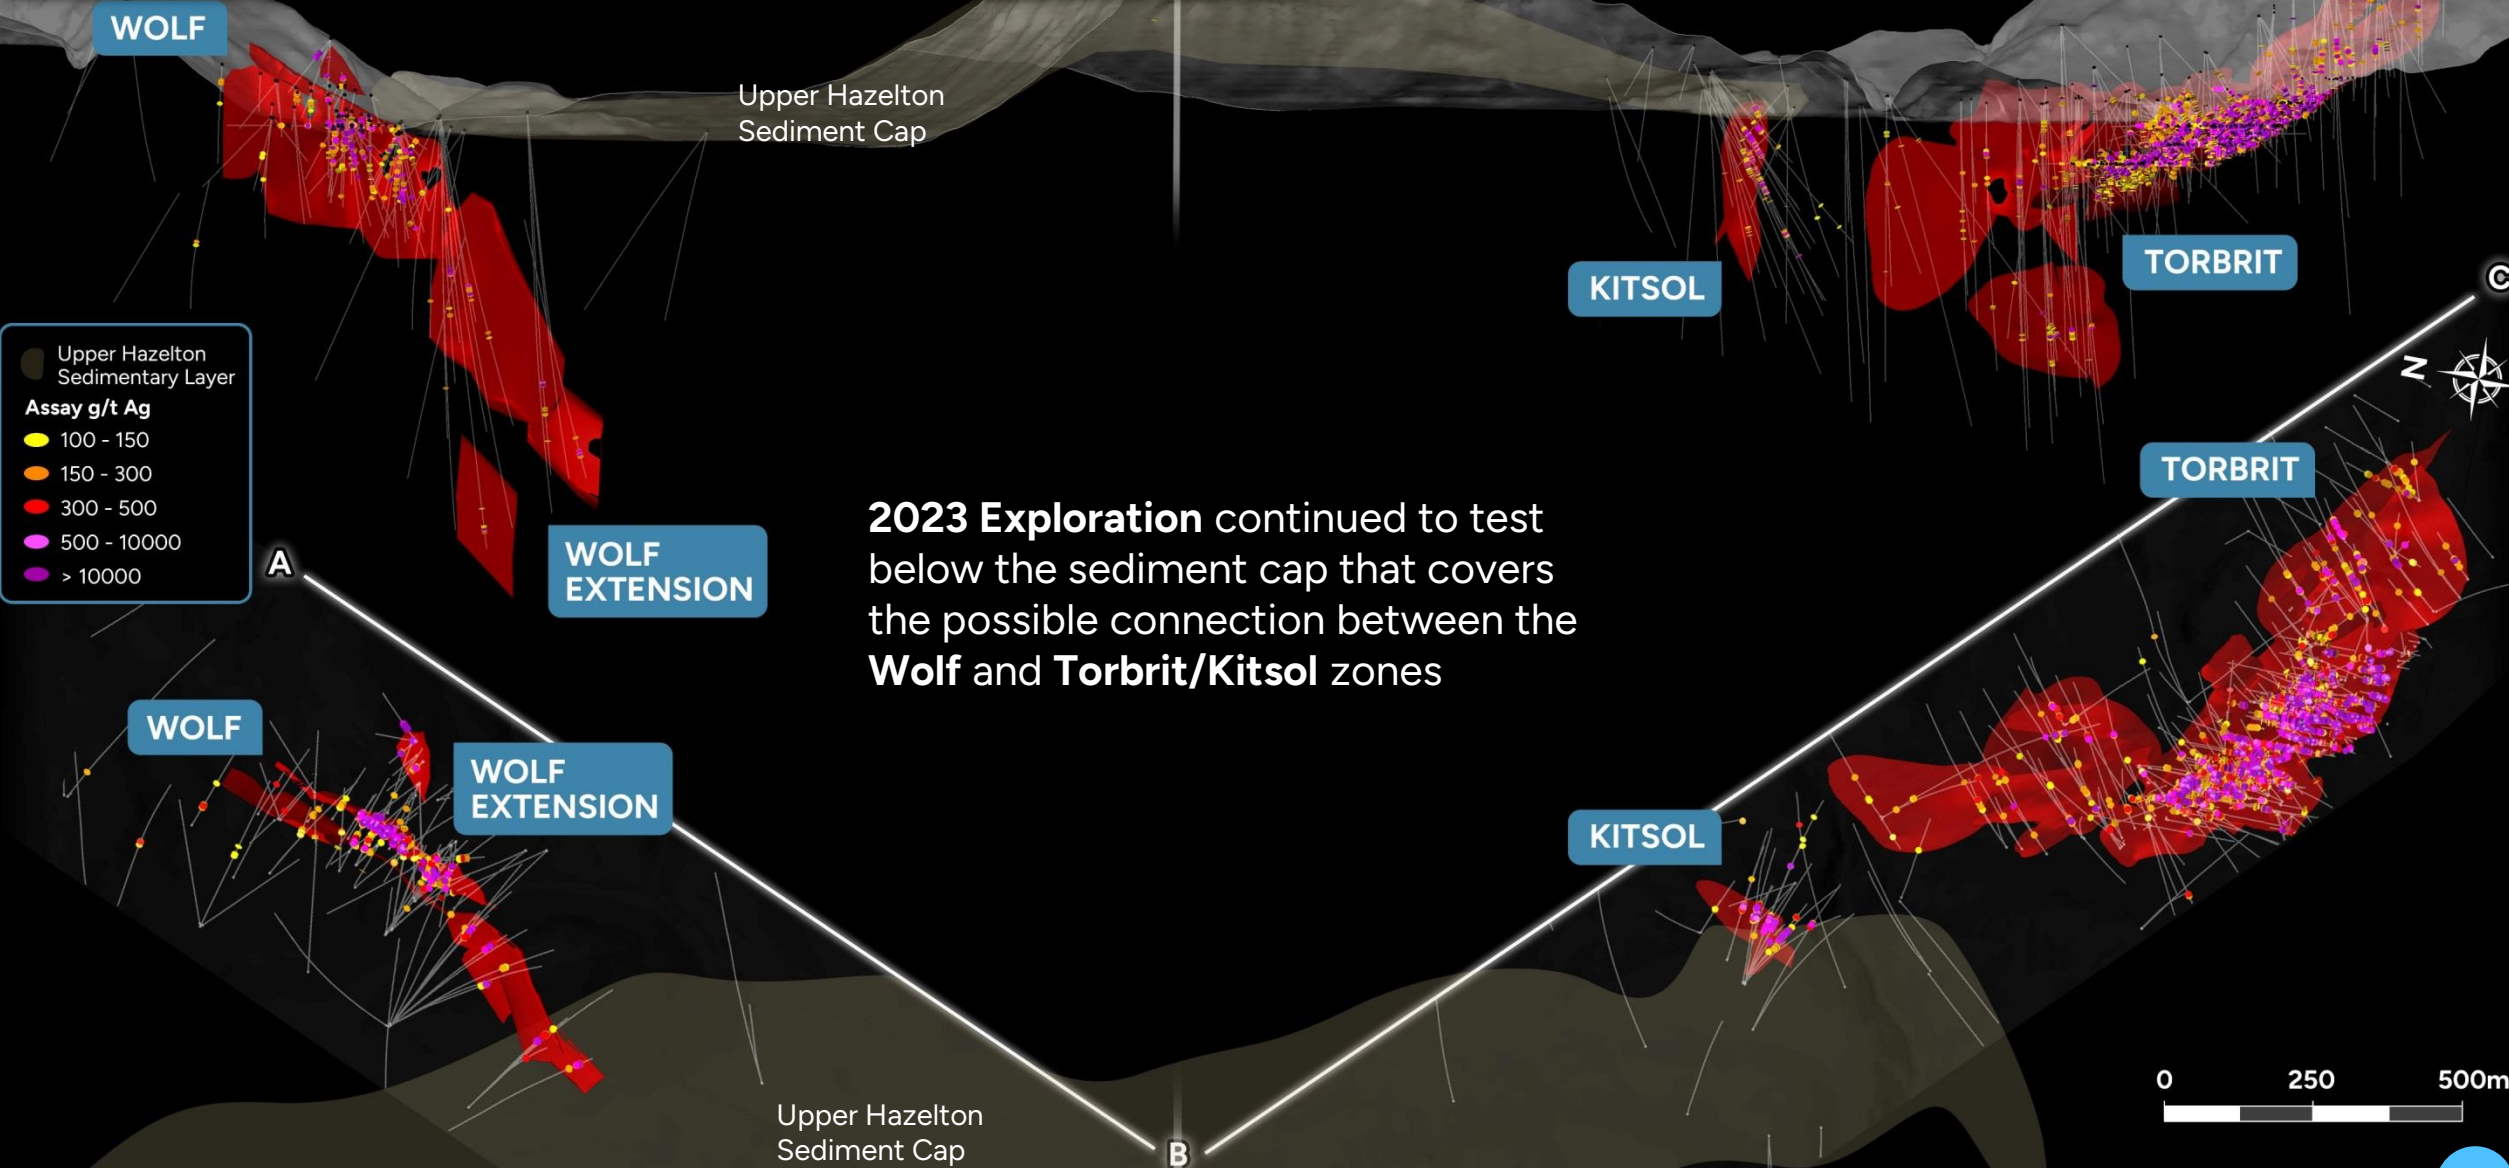

Testing exploration targets with discovery potential along under explored portions of the Kitsault Valley Trend

# Connecting Deposits

# 2023 Drilling

Five drills have completed 51,527 m of diamond drilling on the 2023 program with the flow of results continuing for the next few months. Highlights to date:

## Wolf Vein:

- **DV23-368:** 381 g/t Ag over 29.34 m, including 1,898 g/t Ag over 1.00 m from a 75m Southwest step-out
- **DV23-375:** 461 g/t AgEq\*\* over 26.99 m, including 2,260 g/t AgEq \*\* over 0.5 m from 81 m Southwest step-out

## Kitsol Vein in the Torbrit Deposit:

- **DV23-336:** 342 g/t Ag over 18.00 m including 2,270 g/t Ag over 0.50 m and 995 g/t Ag with 3.6% Pb over 0.60 m at Kitsol
- **DV23-337:** 496 g/t Ag over 9.57 m including 1,100 g/t Ag over 0.73 m at Kitsol

\* Intervals are core length; true widths vary from 64 to 87% of core length interval, assays are uncut

\*\* AgEq is calculated using \$US1650/oz Au, \$US20/oz Ag, \$US0.90/lb Pb and \$US1.10/lb Zn

# Current Mineral Resources

Category	Property	Cut-Off	Tonnes	Ag (g/t)	Ag oz	Au (g/t)	Au (oz)
Indicated	Dolly Varden	150 g/t Ag	3,417,000	299.8	32,931,000		
	Homestake Ridge	2.0 g/t AuEq	736,000	74.8	1,800,000	7.02	165,993
<b>Total</b>					<b>34,731,000</b>		<b>165,993</b>
Inferred	Dolly Varden	150 g/t Ag	1,285,300	277.0	11,447,000		
	Homestake Ridge	2.0 g/t AuEq	5,545,000	100.0	17,830,000	4.58	816,719
<b>Total</b>					<b>29,277,000</b>		<b>816,719</b>

Total Kitsault Valley Project Resources; refer to NI43-101 technical report with effective date of September 28, 2022, dated March 23, 2023, titled "Technical Report on the Combined Kitsault Valley Project, British Columbia", by Andrew J. Turner, B.Sc. P.Geol. and Rachelle Hough, P.Geo. Report posted on [www.SEDAR.com](http://www.SEDAR.com) under Dolly Varden Silver Corporation public documents.

Note: Indicated and Inferred Mineral Resources are not Mineral Reserves Mineral resources which are not mineral reserves do not have demonstrated economic viability There has been insufficient exploration to define the inferred resource as an indicated or measured mineral resource, and it is uncertain if further exploration will result in upgrading the resource to a measured resource category There is no guarantee that any part of the mineral resource discussed herein will be converted into a mineral reserve in the future
